

Projektname: Industrial Engineering and Management Sciences: New Postgraduate Programs	
Akronym: IEMS	
Projektnummer: 544477-TEMPUS-1-2013-1-EG-TEMPUS-JPCR	Dauer: 3 Jahre 01.12.2013-30.11.2016
Koordinierende Hochschule: Ain Shams University, Egypt	
Beteiligte Hochschulen:	Otto-von-Guericke Universität Magdeburg
	Faculty of Engineering, Fayoum University, Egypt
	College of Logistics and International Transport, Arab Academy for Science, Technology & Maritime Transport, Egypt
	Faculty of Engineering, Misr University for Science & Technology, Egypt
	Jönköping University, Sweden
	University of Nottingham, United Kingdom
	University of Oviedo, Spain
	Clausthal University of Technology, Germany
<p>Projektbeschreibung:</p> <p>Development of Master of engineering degrees in four concentrations, each of which will be adopted by one of the four PC universities. The target concentrations are: 1.Operations management, 2. Logistics and supply chain management, 3.Quality control, and 4.Human factor engineering.</p> <p>Designing the target programs curriculum promoting Bologna process and according to ECTS.</p> <p>Establishing and equipping industrial engineering labs for different specializations at PC universities serving master and training programs as well as graduation projects' case studies.</p> <p>Qualifying a caliber of teaching staff capable of delivering and implementing target program courses.</p> <p>Establishing communication and cooperation channel between universities and industry to help designing and continuous enhancement for the program courses to cope with common problems and modern trends.</p>
