

Dear Prof. Finke,

INTAS will publish a brochure in which also summaries of selected (best) project will be included. Your finished project Scheduling for modern manufacturing, logistics and supply chains is one of two selected ones in mathematics.

There is one point that perhaps could be added to your summary - namely the follow-up. Can you, please inform me, if there is some (perhaps partial) cooperation among the former consortium members? If yes, of what kind?

Thank you,

Vladimir Janis

Scientific officer for mathematics

INTAS (in liquidation)
