CERTIFICATE PROGRAMME

FUNDAMENTALS OF RENEWABLE ENERGIES

This certificate course is suited for everyone with an interest to learn more about renewable energies and a bachelor's degree in science or engineering. In 3 modules, the students learn about the fundamentals of renewable energies, the different sources, their materials and energy storage. The course is taught online using Moodle. The credit points (ECTS) acquired of this programme as well as of the International Summer University of Environmental Sciences (ISU) *with Main Focus on Renewable Energy and Climate Protection* will be recognized for the upcoming master's programme „Renewable Energy, Climate Change and Environmental Protection for M.Sc“. For more information go to www.ovgu.de/-p-72898.

Structure

Modul 1:
Renewable Energy: Materials,
components, Function

Modul 2:
Renewable Energy Sources

Modul 3:
Materials for Energy Storage

Start
2019/2020 winter semester

Course fee
2.900,- EUR

Enrolment

No enrolment is required.

ECTS

15 CP (3 modules with 5 CP)

Admission requirement

B2 English level

Teaching language

English

Learning methods

purely online course (e. g. Moodle,
video lectures, online exercises)
