## CERTIFICATE PROGRAMME

# FUNDAMENTALS OF RENEWABLE ENERGIES

This certificate course is suited for everyone with an interest to learn more about renewable energies and a bachelor's degree in science or engineering. In 3 modules, the students learn about the fundamentals of renewable energies, the different sources, their materials and energy storage. The course is taught online using Moodle. The credit points (ECTS) acquired of this programme as well as of the International Summer University of Environmental Sciences (ISU) with *Main Focus on Renewable Energy and Climate Protection* ([www.isu-eco.de](http://www.isu-eco.de)) will be recognized for the upcoming master's programme „Renewable Energy, Climate Change and Environmental Protection for M.Sc“. For more information go to [www.ovgu.de/-p-72898](http://www.ovgu.de/-p-72898).

### Structure

Module 1:  
Renewable Energy: Materials,  
components, Function

Module 2:  
Renewable Energy Project

Module 3:  
Materials for Energy Storage

**Course fee**  
2.900,- EUR

### Enrolment

No enrolment is required.

### ECTS

15 CP (3 modules with 5 CP)

### Teaching language

English

*We strongly recommend an English level of at least B2 level (Upper-Intermediate English)*

### Learning methods

purely online course (e. g. Moodle, video lectures, online exercises)

---
